

ATENEO DE MANILA UNIVERSITY
SYLLABUS FOR UNDERGRADUATE COURSES
MAJOR, CORE CURRICULUM and ELECTIVES

A. COURSE INFORMATION

COURSE NUMBER	ISCS 30.50	NO. OF UNITS	1
COURSE TITLE	Guided Studies in Object-Oriented Programming for Windows		
PREREQUISITE/S	CSCI 21 / MSYS 21		
DEPARTMENT/ PROGRAM	Information Systems and Computer Science	SCHOOL	SOSE
SCHOOL YEAR	2026-2027	SEMESTER	1 st
INSTRUCTOR/S	Luis Gabriel A. Cajucum		
VENUE	F 228 F 228	SECTION	CM CTH
		SCHEDULE	M - 11:00-12:00 Th - 11:00-12:00

B. COURSE DESCRIPTION

This course provides a supplement to Computer Science and Programming. An Object-Oriented Programming (OOP) language such as C# is used to explore the additional features in programming stand-alone applications. Students will develop C# programs that feature OOP components and visual application interfaces.

WHERE IS THE COURSE SITUATED WITHIN THE FORMATION STAGES IN THE FRAMEWORK OF THE LOYOLA SCHOOLS CURRICULA	
	FOUNDATIONS: Exploring and Equipping the Self
	ROOTEDNESS: Investigating and Knowing the World
✓	DEEPENING: Defining the Self in the World
	LEADERSHIP: Engaging and Transforming the World

C. PROGRAM LEARNING OUTCOMES

Alignment of Program to the Core Curriculum Learning Outcomes

The Ideal Ateneo Graduate: A Person of Conscience Competence Compassion Commitment							
CCLO 1	CCLO 2	CCLO 3	CCLO 4	CCLO 5	CCLO 6	CCLO 7	CCLO 8
X	X	X		X			X

Alignment of the Course to the Program Learning Outcomes

PL01	PL02	PL03	PL04	PL05	PL06	PL07
	X	X	X			X

D. COURSE LEARNING OUTCOMES

Alignment of the Course to the Core Curriculum Learning Outcomes

The Ideal Ateneo Graduate: A Person of Conscience Competence Compassion Commitment							
CCLO 1	CCLO 2	CCLO 3	CCLO 4	CCLO 5	CCLO 6	CCLO 7	CCLO 8
X	X					X	

By the end of this course, students should be able to:

COURSE LEARNING OUTCOMES	
CLO 1:	Student should be able to set up the environment for building Windows Object-Oriented Programs (OOP)
CLO 2:	Student should be able to design the visual interface layout of a prototype project
CLO 3:	Student should be able to develop a working prototype project
CLO 4:	Student should be able to present and defend the prototype project

E. COURSE OUTLINE and LEARNING HOURS

Course Outline	CLOs	Estimated Contact or Learning Hours
Module 1: Introduction to Object-Oriented Programming and Console Applications Development using C#	CLO 1 & 3	5-6 hours
Module 2: Creating Windows C# Forms Applications with Data Persistence using XML files	CLO 1, 2, & 3	5-6 hours
Module 3: Sending, Receiving, and Processing of API Calls	CLO 1, 2, & 3	5-6 hours
Module 4: Prototype Project Development	ALL	6-7 hours

F. ASSESSMENTS AND RUBRICS

Assessment Tasks	Assessment Weight	CLOs
Quizzes	20%	CLO 2
Short Exercises	20%	CLO 1, 2, 3
Long Exercises	25%	CLO 1, 2, 3
Prototype Project / Final Project	35%	ALL

Rubrics will be included in the assessment tasks' specifications.

G. TEACHING and LEARNING METHODS

TEACHING & LEARNING METHODS and ACTIVITIES	CLOs
Slides, Lecture Notes, and Videos	ALL
Synchronous and Asynchronous Sessions	ALL
Consultations	ALL
Exercises, Activities, and Quizzes	ALL
Final Project	ALL

H. REQUIRED READINGS

Slides, notes, articles, and any other additional readings provided on Canvas during the semester.

I. SUGGESTED READINGS

- Bancil, M. et al. (2020) Learn C# Programming: A guide to building a solid foundation in C# language for writing efficient programs. Packt Publishing.
- Farrell, J. (2017). Microsoft Visual C#: An Introduction to Object-Oriented Programming (MindTap Course List). Cengage Learning.
- Seebeck, A. (2019). C# Fundamentals. unQbd.
- Sharp, J. (2018). Microsoft Visual C# Step by Step (9th Edition) (Developer Reference). Microsoft Press.
- Solis, D. and Schrotenboer, C. (2018) Illustrated C# 7: The C# Language Presented Clearly, Concisely, and Visually (5th Edition). Apress Media.
- Sutherland, A. (2020). C#: 2 books in 1: The New Beginner's & Intermediate Step by Step Guide to Learn C# in One Week. Including Projects and Exercise to Mastering C#. Independent.
- Whitaker, R. (2016). The C# Player's Guide (3rd Edition). Starbound Software.

J. GRADING SYSTEM

93.00 – 100.00	A	Excellent
87.00 – 92.99	B+	Very Good
81.00 – 86.99	B	Good
75.00 – 80.99	C+	Satisfactory
69.00 – 74.99	C	Sufficient
60.00 – 68.99	D	Passing
Below 60	F	Failure

K. CLASS POLICIES

1. Students are expected to regularly check the course website on Canvas for class updates and announcements.
2. Students with limited or no internet connections are expected to immediately communicate with the instructor regarding their situation so that adjustments may be made and portable learning packages can be provided, if necessary.

3. Only students who are officially enrolled will be included in the Canvas page and be allowed to attend classes and take assessments.
4. It is the student's responsibility to find out what they missed on days that they were absent or late.
5. Attendance will be checked regularly. Since this class is a 1-unit class with 1 meeting per week, the maximum number of allowed absences is three (3). Students who exceed the maximum number of allowable absences will automatically get a grade of W.
6. Specifications for graded assignments will always be given at least one (1) week before the deadline, while the specifications for the final project will be given at least two (2) weeks before the deadline.
7. The use of Generative AI (Gen AI) is NOT PERMITTED for ANY code submission whether it be a graded exercise or a homework assignment. It can only be used for generating samples or test values to be used for testing code.
 - i. For usage such as those stated previously, these will still need to be included in your COA.
 - ii. For further details on our general AI policies, please refer to the [GenAI Policy in Higher Education](#).
8. In line with the DISCS Academic Integrity Policy, deliverables submitted online must include a certificate of authorship, which must state all resources and references that you used EXCEPT for lectures, slides, and syllabus-listed references. Submissions without a certificate will not be accepted and may incur a late penalty once a certificate has been included.

Do NOT use this as an excuse to cheat (ex. "I referred to code from someone who already took this subject", "I copied a project from a YouTube tutorial / github"). Using an external library/package may count as cheating if it automatically implements required concepts without you understanding how.

CoA for individuals and groups can be found on Canvas.

9. Students are expected to abide by the DISCS Lab Policies.
10. The instructor reserves the right to move any due date in part F of this syllabus to a **later** date for reasons including but not limited to class suspensions, reassessment of overall difficulty, and schedule of other subjects.
11. No make-up exercise/due date extensions will be provided unless you were hospitalized, an immediate member of your family died (grandparents and legal guardians included) or there were circumstances that prevented you from accomplishing the requirement (e.g. representing the University or the country in an official capacity). Adequate proof must be provided (e.g. medical certificate, news report) and the hospitalization/wake/disaster/aftermath/representation period must cover the date of the deadline for the deliverable.

It is the student's responsibility, or related third party's responsibility (if the student is incapable), to contact and inform the instructor of any circumstances (such as those listed above) that will result in the student's inability to submit an assignment on time.

12. Late submissions are subject to a late penalty and will always use the latest due date if policy #10 is applied. Late submission will get their maximum attainable score reduced by 10% per day late. Late submissions may no longer be accepted when the number of days past the due date exceeds 10 days.

Late penalties may be mitigated or waived if a reasonable excuse and adequate proof (see policy #11) are provided.

If an extension is given due to policy #10, a one-day late penalty may still be applied but further deductions will be computed based on the new deadline. Non-acceptance of late submissions will also be computed based on the new deadline (i.e. 10 days after the new deadline).

Assignments on Canvas will each be given a due date and may also be given a date for the closing of the submission window. The date for the closing of the submission window will be at least 10 days after the due date. Assignments without a date for the closing of the submission window may still not be accepted when the number of days past the due date exceeds 10 days.

Assignments must be submitted on or before the specified due date to prevent any late penalties. Assignments must be submitted within 10 days after the specified due date or before the specified closing date of the submission window to prevent non-acceptance of their submission.

13. Failure to submit an assignment by the end of the course, whether due to simple nonsubmission or due to policy #12, automatically corresponds to a grade of zero for that assignment unless a reasonable excuse and adequate proof are provided (see policy #11). The end of the course refers to the end of the last day of regular classes and applies to all assignments whose due date is at least 10 days before the last day of regular classes.

Failure to submit all other assignments by the end of the last day of the final assessment days will automatically correspond to a grade of zero for those assignments unless a reasonable excuse and adequate proof are provided (see policy #11).

This policy (#13) will also apply to students who are graduation candidates with the end of the course referring to the end of the last day of regular classes for graduating students and the end of the last day of the final assessment days referring to the end of the last day of the final assessment days for graduating students.

14. A grade of INC will only be issued for exceptional cases (e.g. involving extraordinary circumstances meriting consideration by the instructor).
15. Cheating will not be tolerated. Cheating in any requirement will result in a minimum penalty of having a grade of 0 for that requirement, and will be reported to the appropriate authorities, as provided for by the Student Handbook. Duplicate work will merit penalties for both the student who copied the work and the student from whom the work was copied from.
16. Cumulative numeric grades below 60 are NOT rounded off, even if the grade is 59.9999~~~

Rounding off grades is NOT automatic and is at the discretion of the instructor.

17. Final grades displayed on Canvas do NOT represent your official final grades for the class.
18. No extra-credit work will be issued. Ever. Even if you ask nicely. I will ignore any requests for extra-credit work regardless of the circumstances that led to your making the request. This also applies to requests made by a third party on your behalf.
19. Office hours are Monday to Friday, 8:00 - 17:00. During this time, the instructor will do their best to respond to your queries as soon as possible. For queries made outside of office hours, please do not

expect a prompt response from the instructor. Posting of announcements, modules, and materials will also be kept within office hours.

20. All communication should be done solely through either email or through the messaging functionality of Canvas, except for cases wherein it is difficult for you to do so. Canvas is the preferred method of communication. For email communication, please use your Ateneo student email.
21. Feel free to send an email or Canvas message to the instructor for any concerns regarding the class or class policies, or for scheduling an online/onsite consultation. For your safety, either a third person within the academic community will be invited to oversee every consultation (with consent from both teacher and student), or an unaltered recording of the online consultation session can be made available to you after.
22. You can access the Loyola Schools Gender Policy, the Code Decorum on Sexual Harassment, and the Undergraduate Student Handbook (2025) using the following links:

Loyola Schools Gender Policy:

<https://www.ateneo.edu/central/policies/he-gender>

Code of Decorum on Sexual Harassment:

<https://www.ateneo.edu/policies/code-decorum-investigation-sexual-harassment>

Undergraduate Student Handbook (2025):

<https://www.ateneo.edu/college/current-students/handbook>

- L. Policies may be added or changed should the need to do so arise. However, these will require your consent if they are not issued by the department chair or another university authority.

M. CONSULTATION HOURS

NAME OF FACULTY	EMAIL	DAY/S	TIME
Luis Gabriel A. Cajucom	lgcajucom@ateneo.edu	M/Th	12:00-2:00pm Please schedule consultations at least 2 Days in advance

Reference:

Core Curriculum Learning Outcomes (CCLOs)

CCLO 1	Demonstrate effective communication skills (listening and speaking, reading and writing) in English and Filipino.
CCLO 2	Evaluate information and issues in various spheres of life using mathematical reasoning and statistical tools to process and manage data.
CCLO 3	Propose ways to address pressing social and ecological problems using appropriate critical approaches and scientific thinking
CCLO 4	Develop a creative and moral imagination that is responsive to contemporary global realities and challenges, but also deeply rooted in local histories, conditions, norms, and institutions.
CCLO 5	Internalize the significance and value of her/ his unique existence and purpose in life in light of Christian faith.
CCLO 6	Discern life choices with a keen awareness of ethical dilemmas and considerations.
CCLO 7	Exemplify a commitment to enhancing human life and dignity, especially those who are excluded and in greatest need.
CCLO 8	Practice a vision of leadership and committed citizenship rooted in Christian humanism.

Program Learning Outcomes (MPLOs)

PLO 1	Identify critical needs of society that may be addressed by ICT.
PLO 2	Deconstruct organizational processes through systems thinking.
PLO 3	Exhibit professionalism and ethical behavior in all areas of work.
PLO 4	Liaise between technical and non-technical stakeholders in implementing ICT-based solutions.
PLO 5	Lead IT practitioners towards achieving strategic IT goals of an organization
PLO 6	Evaluate effectivity of IT solutions
PLO 7	Create ICT-based systems that address organizational problems.
